This represents an increase of approximately \$300 million in losses reported in 2020 versus what was reported by victims over 60 in 2019.” “Americans 50 and older lost nearly \$3 billion last year, a 62 percent increase from 2020.” During this presentation, we look at many of the scams that seniors face and what we can do to prevent them from happening.

## DPI-SIG PHOTOGRAPHERS FOR NON-PROFIT ORGANIZATIONS

**Joe Bucherer**, Director of Photographers for Non-Profit Organizations, suggests when you see an email requesting a photographer for a non-profit event, don't be afraid to volunteer and give back to the community. We do not accept every organization that asks for photographers. Joe and the committee thoroughly check to make sure the organization is non-profit before committing our talent and time! However, once you volunteer for the experience, the personal rewards are priceless!

If you volunteer your time, please be sure to let Joe know: [jbucherer@gmail.com](mailto:jbucherer@gmail.com) .

## **GLOSSARY TERM**

**JANUARY - GLOSSARY TERM: Mosaic balance:** Mosaic balance (or crystallographic balance) results from balanced chaos. Think Jackson Pollack paintings. The composition lacks distinct focal points, and the elements share a uniform emphasis. The lack of hierarchy leads to visual noise at first glance. The result isn't a perfectly symmetrical pattern, but a type of balanced chaos in which several different elements combine into a unified whole.

**DECEMBER – GLOSSARY TERM: Contrasting Textures:** Putting two contrasting textures together adds visual weight to the space, meaning that components of your design will be able to draw the eye more easily. This works best when two contrasting textures — rough and smooth — are used in close proximity to each other. Color and tone aren't the only ways to create contrast; including different textures in your image is another great way to add contrast to your images.

Look for interesting contrasting textures to incorporate into your image: a delicate leaf resting on a solid stone, for instance – or a smooth drop of water on the surface of a fuzzy leaf. Macros are an especially excellent opportunity to capture images with contrasting textures, as close-ups often reveal a hidden world of patterns – and beautiful textures.
