Topic: Backups in a Busy World.

Given enough time, every hard drive eventually fails, and most often, this means that all your photos, documents, and video — everything! — is lost. And recent evidence suggests that even under the best circumstances, hard drives don't last as long as previously thought. Backups are the only defense against serious data loss, yet most people don't bother. So instead, discover essential strategies to ensure your data is safe with the least amount of trouble.

Guests are welcome to take a look at what PCBUG offers. PCBUG Annual Membership dues are only \$25.00 a year.

DPI-SIG PHOTOGRAPHERS FOR NON-PROFIT ORGANIZATIONS

Joe Bucherer, Director of Photographers for Non-Profit Organizations, suggests when you see an email requesting a photographer for a non-profit event, don't be afraid to volunteer and give back to the community. We do not accept every organization that asks for photographers. Joe and the committee thoroughly check to make sure the organization is non-profit before committing our talent and time! However, once you volunteer for the experience, the personal rewards are priceless!

If you volunteer your time, please be sure to let Joe know: jbucherer@gmail.com .

GLOSSARY TERM

MAY - GLOSSARY TERM: Uncompressed RAW: An uncompressed RAW file preserves all of the data in an image without compression. All image data is stored with no impact on quality, giving the freedom to manipulate aspects of the photo like brightness, color, sharpness, and noise reduction with minimal quality loss.

It is recommended when both high image quality and developing speed are required, this format can be developed more quickly by development software than Lossless Compressed RAW. It produces the largest RAW image file size.

APRIL - GLOSSARY TERM: Light Feathering: Is maneuvering a light source's area of coverage so that only the desired area of the subject is lit. This helps you emphasize the area in your photo that you want to highlight and not the entire area of your softbox potential, which makes for a better quality of light.
